

Hakomi Mindful Somatic Psychotherapy:

AN EXPERIENTIAL INTRODUCTION

NEW YORK, NY
APRIL 27-28, 2019

*"A visionary contribution to mindfulness in psychotherapy."
-Daniel Siegel, author of "The Mindful Brain"*

"Hakomi presents some astounding methods for getting to core material. It is well-grounded in theory, and revolutionary in its results." - Association of Humanistic Psychology

Hakomi integrates mindfulness and somatics into the psychotherapy process with profoundly effective results:

The dynamic use of mindfulness is a foundation of the Hakomi Method. When integrated into the therapy session with unique Hakomi techniques, it creates a rapid, experiential access route to unconscious core beliefs and implicit memories that invisibly shape our lives and behavior. Once conscious and directly experienced, these are available for memory re-consolidation and transformation, including the healing of attachment issues.

This experiential process evokes a powerful "felt sense" for the client, allowing them to take ownership of core patterns as they emerge, and integrate new options. Loving presence and the healing relationship are also central elements in Hakomi, and create a deep sense of safety and connection.

Hakomi Mindful Somatic Psychotherapy has developed over 35 years, supported by thousands of hours of clinical experience, and by advances in the neuroscience of mindfulness and attachment. It is effective for both brief and long-term therapy, in a wide range of applications including work with individuals, couples, and groups.

Course Objectives:

You will be able to utilize:

- The integration of psychodynamic mindfulness into your sessions with clients
- The practice of loving presence to enhance the therapeutic relationship
- The Hakomi principles, including nonviolence in therapy, to create safety and support the cooperation of the unconscious
- The use of experiments in mindfulness to discover unconscious material
- Verbal contact that will deepen the client's experiential process
- Skills to discover and contact subtle, somatic cues in the body and its habitual patterns
- The use of this information to create safe, yet powerful access routes to core unconscious material
- The application of Hakomi skills and principles in the experiential process

This workshop is designed for therapists, counselors, social workers, coaches, healing professionals and graduate students in these fields. It also serves as the prerequisite for the Comprehensive Training in Hakomi Mindful Somatic Psychotherapy.

FACULTY

Melissa Grace, M.A., (Counseling Psychology) is a Certified Hakomi Trainer and one of the Hakomi Institute's leading faculty. She has led Hakomi trainings throughout the U.S. since 1995, and is a member of the Hakomi Institute

Board of Directors. She served as Adjunct Faculty at Naropa University and has trained extensively in group leadership. Melissa maintained a private practice in Boulder as a Registered Psychotherapist for over 20 years, currently teaches in Europe and the U.S, and has a Hakomi Integrated Coaching practice in Boulder and online with individuals and groups.
